

Uproc2

The comfortable hardtail

Riding stability, comfort, and propulsion are the main characteristics of the Uproc2. The extremely rigid aluminium frame, comfortable geometry with a low top tubing height, and stable 29-inch tyres offer safety and control. A suspension fork with 120 mm suspension travel, strong disc brakes, and the powerful Panasonic GX Ultimate motor allow adventures off the beaten track. The large 630 Wh battery provides a long range. The cleverly integrated battery can be easily and conveniently replaced with a spare battery when required and on particularly long tours.
