

Uproc3

The marathon e-mountainbike

Enjoy epic tours, on the most varied trails, endless differences in altitude, for days on end. The battery capacity of the Uproc3 with a possibly record-breaking 1125 Wh (with the DualBattery option) provides the necessary energy and a massive range. The Bosch Performance Line CX drive of the latest generation is impressive with its extremely powerful and perfectly dispensed assistance – even on the steepest inclines. On challenging descents, the potent chassis (suspension travel of 140mm at the front and 130 mm at the back), the sporty yet comfortable seating position, and the voluminous 2.6-inch tyres provide a high level of riding comfort and safety. Thanks to its versatility, the Uproc3 is the Swiss army knife among e-mountainbikes.
