

Gotour4

The agile and comfortable classic model

As the sister model to the Gotour5, the Gotour4 loves to ride through varied landscapes, preferably in company. With its smaller 26-inch wheels, it is particularly agile and manoeuvrable. The XS and S frame sizes plus the low step-through make the Gotour4 the ideal e-bike for smaller riders, too. The Gotour4 has been consistently designed for comfort with its upright seating position, height-adjustable handlebars with Speedlifter and comfortable saddle. Combined with the Panasonic motor that provides smooth and powerful assistance and the high-capacity battery designed for a long range, the Gotour4 guarantees endless riding enjoyment. The Gotour4 offers wellness with wind in your face.

Panasonic GX Ultimate / GX Power motor

The powerful Panasonic motors provide a great deal of power for steep ascents and effortless hill starts. The top models are equipped with the powerful Panasonic GX Ultimate, which delivers 90 Nm torque. The entry-level models come with the particularly quiet Panasonic GX Power, which also provides assistance up to 300 % and a maximum torque of 60 Nm.

FIT display and remote

The control elements developed by FIT are clearly laid out, simple to operate and perfectly ergonomic – quality you can touch and experience.

FLYER STB-750 or STB-630 battery

With its high-capacity 630 or 750 Wh FLYER Seat Tube Battery (STB), the Gotour4 is a champion of both distance and altitude. The battery can be charged on the bike itself or easily removed. The large grip area makes for simple handling.

Speedlifter Twist

With the Speedlifter Twist, the handlebars can be vertically adjusted in just two steps (no tools required), allowing you to set a comfortable seating position. The handlebars can be turned 90° to save space when storing the FLYER e-bike.

Wide and low step-through

For convenient mounting and dismounting. The low centre of gravity guarantees confident handling and maximum riding safety.

Low-maintenance belt drive (Gates Carbon Drive)

The high-quality carbon-reinforced belt drive is clean, particularly low maintenance and does not rust.
