

Uproc2

The tried-and-tested comfortable hardtail

Fun with the Uproc2 starts where the asphalt ends! The tried-and-tested comfortable hardtail smooths out every forest trail and every gravel road. Riding stability, comfort, and propulsion are the main characteristics of the Uproc2. The extremely rigid aluminium frame, comfortable geometry with a low standover height, and stable 29-inch wheels offer safety and control. A suspension fork with 120 mm of travel, the potent disc brakes and the powerful Panasonic GX Ultimate motor make adventures possible. A 630 Wh battery, or the option of a 750 Wh battery, provides a long range. The Uproc2 turns every path into a playground.

Panasonic GX Ultimate motor

Weighing just 2.9 kg, the Panasonic GX Ultimate is one of the lightest in its class, yet at the same time provides record levels of assistance with 90 Nm torque. The powerful drive unit is impressive with its constant power output across an extremely wide pedal cadence range, which means the best level of assistance is also guaranteed at a low pedal frequency.

FIT display and remote

The control elements developed by FIT are clearly laid out, simple to operate and perfectly ergonomic – quality you can touch and experience.

FLYER SIB-750 or SIB-630 battery

The semi-integrated 630 or 750 Wh FLYER Smart Integrated Battery (SIB) provides a great deal of energy for long tours that cover large differences in altitude.

SIB battery integration

Smart battery integration makes it easy to change the battery and guarantees a vibration-free fit even in rough terrain. The L-shaped down tube construction maximises frame rigidity and guarantees precise and confident handling.

Stable 29" wheels

With their excellent roll-over resistance, the large 29-inch wheels guarantee a high level of riding stability plus comfortable and confident handling.
