

Uproc3

The endurance athlete with full suspension

The Uproc3 expands the radius for epic tours on the most varied trails and is ready to set new records in terms of altitude. The endurance all-rounder climbs up hills efficiently and masters any descent comfortably. The battery capacity of a possibly record-breaking 1125 Wh (with the DualBattery option) makes the Uproc3 the top FLYER endurance e-mountainbike and guarantees a massive range. The extremely powerful Bosch Performance Line CX drive allows you to take on long and steep ascents with a smile on your face thanks to the perfectly dispensed assistance. On descents, the potent chassis (140 mm of travel at the front and 130 mm at the back), the sporty yet comfortable seating position and the voluminous 2.6-inch tyres provide a high level of riding comfort and control. Thanks to its versatility, the Uproc3 is the Swiss army knife among e-mountainbikes.

Bosch Performance Line CX motor

The most powerful Bosch drive is particularly compact, yet still provides high levels of performance and efficiency. The Performance Line CX offers impressive acceleration, reacts without delay and is convincing with its agile handling and enhanced control. With a torque of 85 Nm, up to 340 % perfectly dispensed assistance and dynamic response characteristics, the Performance Line CX takes e-biking pleasure to new heights.

Bosch Purion / Kiox display (optional)

The Purion is the minimalist display for anyone who wants an uncluttered look on their handlebars. The compact display is also the operating console and shows the most important information. The Kiox display is available with a separate remote as an option. Ideal for ambitious sporty riders, the Kiox displays comprehensive riding and training data, while providing access to the digital world via the smartphone app.

Double range

The battery capacity of up to 1125 Wh (with a DualBattery option) guarantees a massive range, which is ideal for endless tours and great differences in altitude.

Simple battery handling

The main battery, which is fully integrated into the down tube, can be removed in just two steps and charged externally.

Four-link suspension – 130 mm of travel

With its four-link suspension design and 130mm of travel specifically optimised for e-bikes, the active chassis ensures optimal comfort and riding safety on the most varied of trails.

MonkeyLink-ready

The intelligent MonkeyLink interfaces make it extremely easy to click accessories, such as a headlight, into place using a magnetic feed. The lights are supplied with energy from the e-bike's battery.
