

Upstreet1

The agile speedster for around town

Perfectly adapted for an urban lifestyle, the Upstreet1 displays its true greatness in confined spaces. With its compact dimensions and refreshing design, this extraordinary e-bike combines urban mobility with riding fun. Despite its compact 20-inch wheels and agility, the Upstreet1 boasts an astoundingly high level of riding stability, and with the riding comfort expected of FLYER, is convincing over long distances, too. The whisper-quiet Bosch drive allows the speedster for around town to ride through urban areas almost silently. And through all this, the Upstreet1 remains faithful to the "one for all" motto: this one-size e-bike is suitable for anyone who is 150 to 190 centimetres tall. The Upstreet1 offers agile mobility for any situation.

Bosch Performance Line / Active Line Plus motor

With a sporty torque of 60 Nm and a high level of performance, the Bosch Performance Line drive unit always provides the right level of assistance at the right time. The entry-level model is equipped with the Bosch Active Line Plus. The particularly quiet motor provides the rider with assistance up to 50 Nm.

One size fits all

This one-size e-bike remains faithful to the "one for all" motto and is suitable for anyone who is 150 to 190 centimetres tall. The Speedlifter Twist Pro means that, in the same way as the saddle, the handlebars are easy to adjust vertically in just two steps without tools.

Convenient battery charging

With just a few easy moves, the integrated PowerTube 500 battery can be removed for charging. Alternatively, the battery can also be charged directly on the e-bike using the protected charging port.
