

Upstreet3

The powerful giant

The Upstreet3 motivates you to spend more time on two wheels and is impressive with its wide area of use, which ranges from speedy commuting to work to a detour via country paths on the way home from work. With its sporty and elegant appearance, it is hard to believe that this e-bike is also designed for more robust riding. The components have been carefully selected for the highest level of stability, which means the e-bike is approved for a higher total weight of 180 kg. The suspension seat post, the robust air suspension fork and the potent brakes combine to handle the highest loads and the Panasonic GX Ultimate drive provides the appropriate energy. The Upstreet3 offers the utmost in terms of ergonomics for tall riders. The giant among e-bikes is available in additional frame sizes (XXL and XXXL) and the All up stem can be ideally adjusted to the rider's height. The Upstreet3 is also available as a high-speed version with pedal assist up to 45 km/h for speedy commuting. The Upstreet3 literally goes the extra mile.

Panasonic GX Ultimate motor

Weighing just 2.9 kg, the Panasonic GX Ultimate is one of the lightest in its class, yet at the same time provides record levels of assistance with 90 Nm torque. The powerful drive unit is impressive with its constant power output across an extremely wide pedal cadence range, which means the best level of assistance is also guaranteed at a low pedal frequency.

FIT display and remote (D1 for the HS model)

The control elements developed by FIT are clearly laid out, simple to operate and perfectly ergonomic – quality you can touch and experience. The high-speed model with the 3.5-inch FIT D1 display comes up trumps with its comprehensive additional functions.

FLYER SIB-750 battery

The semi-integrated 750 Wh FLYER smart integrated battery (SIB) provides a great deal of energy for long tours that cover large differences in altitude.

Clever SIB battery integration

Smart battery integration makes it easy to change the battery and guarantees a vibration-free fit. The battery can be charged on the bike itself or away from the bike.

Additional frame sizes (S-XXXL)

The additional XXL and XXXL frame sizes mean that tall e-bikers measuring up to 2.15 m will also find the Upstreet3 comfortable to ride and can enjoy the comfort of a perfectly ergonomic e-bike. It goes without saying that the Upstreet3 is also available in the conventional frame sizes S-XL.

High maximum permitted load

The Upstreet3 boasts particularly stable components and has been tested and approved for a total weight of up to 180 kg.

180 kg
