

UPSTREET6

THE DYNAMIC SPEED ICON

Efficient, active, durable – the Upstreet6 brings a new mobility to everyday activities. This high-speed e-bike (s-pedelec) is perfect for rapid commuters. The powerful hub motor generates significant and almost silent thrust, creating dynamic momentum.

Incredibly quiet yet dynamic, the new TDCM HCA5 hub

motor, with a peak performance of 825 watts and 37 Nm of torque, produces rapid acceleration and smooth speed. For additional comfort, the optional suspension on fork can be added. For ease of use, the battery is placed directly into the L-shaped down tube the battery without a cover.

7.10 HS
Chameleon Satin

825^{WATT}
FOR MAXIMUM ACCELERATION

When braking or in certain modes, the motor gains energy, which is then put back into the battery to increase the range. In Long-Life Mode, the battery only charges to 80 %, and when the battery reaches a

charge of 20 %, the rider is informed that the battery needs charging. Not using the full battery capacity helps to maximize the life of the battery.

Extra-quiet, up to 45 km/h

Rapid acceleration and smooth at top speed

810 Wh battery capacity

Maximum mobility throughout the day on long routes

FIT D1 display integrated in the stem

Clear navigation and connectivity at full speed
